

Horrible moving experience. On their website they claim to use: Protective Blankets, Plastic Wrap, Tie Downs, and Professional Straps for Delicate, Large & Heavy Furniture -- they did not!! Two young men showed up, the cab of the truck smelled like they just smoked a joint (truly). We informed them of the delicate and fragile items and provided instructions. They put items all over the truck, with no real plan or care. I have a grandfather clock that is made almost entirely of glass. I gave them very specific instructions on how to handle it and how to put it in truck. They did the EXACT OPPOSITE of what I requested. Most of our wood furniture got multiple scratches from them, which are very visible and hard to hide. They also damaged walls in our new home when they were moving the furniture in. Terrible experience. I would highly recommend you consider other movers!!!!
